

Green Society Public School

Ratnanagar-7, Sauraha, Chitwan

Third Terminal Examination-2082

D- 18

Class: Four

Time: 2 hrs.

F.M.: 50

Sub: Science

1. Tick the best answer from the given alternatives. [10×1=10]

- (a) What is the unit of Length?
(i) Second (ii) Metre
(iii) Kilogram (iv) Litre.
- (b) Which of the following is an old and cheap means of mass communication?
(i) Radio (ii) Television
(iii) Cinema (iv) Mobile.
- (c) DVD stands for:
(i) Digital Versatile Disc (ii) Digital Versatile Device
(iii) Direct Versatile Disc (iv) All of them.
- (d) Which gas is used by plants during photosynthesis?
(i) Argon (ii) Nitrogen
(iii) Oxygen (iv) Carbondioxide.
- (e) Population growth Causes _____ Impact on environment.
(i) Positive (ii) Negative
(iii) Increases (iv) Decreases.
- (f) Which of the following is the reproductive organ of a plant?
(i) Leaf (ii) Flower
(iii) Root (iv) stem
- (g) The process of removing undigested food and toxic materials from the body of living organisms is called _____.
(i) Reproduction (ii) Excretion
(iii) Nutrition (iv) Digestion.
- (h) What is the process of liquid changing into gas on heating called?
(i) Melting (ii) Freezing
(iii) Condensation (iv) Evaporation.

(i) Which energy is used by electric bulb?

- (i) Electric (ii) Solar
(iii) Magnetic (iv) Heat

(j) Smoke and dust particles cause _____.

- (i) Water pollution (ii) Air pollution
(iii) Noise pollution (iv) Land pollution.

2. Very short answer questions. [6×1=6]

- (a) Define scientific Learning.
(b) What is the unit of mass?
(c) Write any one combustible liquid.
(d) What is an example of autotrophs?
(e) What is energy?
(f) What is the main source of energy?

3. Short answer questions. [9×2=18]

- (a) Why magnet attract magnetic materials?
(b) What is reproduction? Why is it important?
(c) Write any two characteristics of magnet?
(d) Dry wood is an insulator, why?
(e) Write any two forms of energy?
(f) Why is copper used for making wire?
(g) Write the function of each.
(i) Flower
(ii) Leaf
(h) What are aquatic plants? Write any two examples.
(i) Define: (i) Breathing (ii) Freezing

4. Long question Answer. [4×4=16]

- (a) Write any two differences between autotrophs and heterotrophs.
(b) Draw a well labelled diagram of Life cycle of butterfly.
(c) Nepal has a high tendency to generate hydroelectricity, why? Give reason.
(d) What is magnet? How will you identify magnetic materials from the group of magnetic and non-magnetic materials?

THE END
